

CARBO-OH

ALKALINITY BUILDER PH BOOSTER

DESCRIPTION:

Carbo-OH is a strongly alkaline compound used for the adjustment of boiler water alkalinity. When used in conjunction with other boiler water treatment chemicals a more desirable hardness precipitate is formed. It also increases silica solubility in the boiler water.

APPLICATION AND DOSAGE:

Carbo-OH may be mixed with other boiler water treatment chemicals and fed via a chemical feed pump to the boiler feed water tank. It can also be slug fed to the boiler feed water tank, if necessary. Use sufficient Carbo-OH to maintain a hydroxide alkalinity of 150-500 mg/L in the boiler water.

PRODUCT DATA:

FORM: Liquid

SPECIFIC GRAVITY: 1.27

pH: 14

FREEZE POINT: -16°C

HANDLING:

Avoid contact with skin, eyes, or clothing. If contacted, wash skin with fresh water. This product is alkaline. If in contact with eyes, flush with fresh water for at least 15 minutes and seek immediate medical attention. Refer to Safety Data Sheet for additional information.
