

MOLYHIB-C

CLOSED SYSTEM CORROSION INHIBITOR

DESCRIPTION:

Molyhib-C is a multi-functional molybdate base product for corrosion and scale control in closed re-circulating systems. It provides complete corrosion protection for both ferrous and non-ferrous metals in hot or chilled water systems.

APPLICATION AND DOSAGE:

Molyhib-C may be added directly to the system by either a pot feeder or chemical injection pump. It should be applied to the suction side of the re-circulation pump or other location where good mixing will occur. Provide sufficient Molyhib-C to maintain 100-150 ppm Mo (Molybdenum) in the water.

PRODUCT DATA:

FORM:	Liquid	FREEZE POINT:	0 Degrees C
pH:	11.4	SPECIFIC GRAVITY:	1.09 g/L

HANDLING:

Avoid contact with skin, eyes, or clothing. If contacted, flush skin and/ or eyes with large quantities of fresh water and get medical attention. Refer to Sheets for more instructions.
