

MOLYHIB-STS

BOILER WATER TREATMENT STEAM CORROSION INHIBITOR

DESCRIPTION:

Molyhib-STS is a multi-functional scale and corrosion control treatment used in pressure steam boilers. It is ideally suited in high make up applications such as steam humidification. Molyhib-STS passivates the ferrous metal surfaces which protects those surfaces from oxygen corrosion both while in operating and in standby modes.

APPLICATION AND DOSAGE:

Molyhib STS may be applied to the boiler feed water system via a chemical feed pump or slug feed. The startup dosage is 1 Litre of Molyhib STS for every 1,000 Litres of water in the boiler. Treatment control is then adjusted to maintain 75 - 125 mg/L Mo (Molybdenum) in the boiler water.

PRODUCT DATA:

pH: 11.4	FORM: Liquid	SPECIFIC GRAVITY: 1.23
COLOR: None	FLASH POINT: None	FREEZE POINT: -1

HANDLING:

Harmful if swallowed; do not induce vomiting. Avoid contact with skin, eyes, or clothing. If contacted, wash skin with water. If eyes are affected, flush with ample water and get medical attention. Refer to Safety Data Sheets for additional information.
