

No. 87 or No. 98

Cooling Water Compound

DESCRIPTION:

This product is a concentrated corrosion and scale preventative compound for cooling towers and condenser feed water. It is ideally suited for use in open recirculating cooling towers. It contains anti scaling agents, cathodic and anodic inhibitors and will prevent corrosion of both steel and soft metals. It allows high cycles of concentration by controlling alkalinity.

APPLICATION AND DOSAGE:

Dosage rate will vary according to local operating conditions and cycles of concentration. As an initial treatment, add 1 part product to each 2000 parts of water in the system. Maintain dosage amount at the same rate with respect to the volume of make-up water times the cycle of concentration.

PRODUCT DATA:

pH:	1-2	FREEZE POINT:	Not Available
Flash Point:	N/A	SPECIFIC GRAVITY:	1.06
COLOR:	clear, colorless	FORM:	Liquid

HANDLING:

Harmful if swallowed; do not induce vomiting. Avoid contact with skin, eyes, or clothing. If contacted, wash skin with water. If eyes are affected, flush with ample water and get medical attention. Refer to Safety Data Sheets for additional information.
