

OXY-C

COOL WATER OXYGEN SCAVENGER

DESCRIPTION:

Oxy-C is a highly effective, fast, and complete, liquid oxygen scavenger designed for quick removal of dissolved oxygen in cool water systems. Certain feed water tanks lack the temperature required for typical boiler oxygen scavengers to work effectively; Oxy-C does not require elevated temperature in order to be effective.

APPLICATION AND DOSAGE:

Oxy-C may be mixed with other boiler water treatments for addition to the boiler. Oxy- C can be fed via a chemical injection pump to the storage section of a deaerator or feed water tank. Dosage rates can be estimated by adding 12 mg/L product for every 1 mg/L dissolved oxygen in the feed water. Apply extra Oxy-C® to maintain a feed water dissolved oxygen level below 1 ppm.

PRODUCT DATA:

pH:	7.2	SPECIFIC GRAVITY:	1.28
Color:	Clear to Faint Pink	FREEZE POINT:	-0°C
FORM:	Liquid	FREEZE POINT:	Not Applicable

HANDLING:

Avoid contact with skin and eyes. Harmful if swallowed. Do not breathe vapors. If contacted, flush skin and/or eyes with large quantities of water. Get medical attention. Refer to Safety Data Sheets for specific instructions.
