

# OLY-BITER

## BOILER SCALE TREATMENT

### DESCRIPTION:

Poly-Biter is a multi-blended polymer EDTA complex boiler water treatment product which provides scale dissolution, suspension, and removal for boiler internals. Poly-Biter when applied as directed may soften and remove existing scale deposits, the effectiveness of this will depend on scale age, thickness, and composition. For this reason, no guarantees are made on the effectiveness of program, this product may not work well on iron-based corrosion byproduct deposits.

### APPLICATION AND DOSAGE:

Poly-Biter® should be injected into the feed water pump suction and control of injection dictated by feed water pump run time. Feed rates of Poly-Biter® will be dependent on factors such as feed water quality, condensate return and makeup quality. Effectiveness will be monitored using flue temperature probe readings/ history and post treatment inspection results.

### PRODUCT DATA:

pH:	10.7	FREEZE POINT:	-1°C
Flash Point:	None	SPECIFIC GRAVITY:	1.15
COLOR:	Colorless	FORM::	Liquid

### HANDLING:

Harmful if swallowed; do not induce vomiting. Avoid contact with skin, eyes or clothing. If contacted, wash skin with water. If eyes are affected, flush with ample water and get medical attention. Refer to Safety Data Sheets for additional information.
